# PC 6

A compact, light-weight entry in the Point Concentric series, the PC 6 fits well into many applications with its 70° conical pattern. It ships with standard M10 fly points and also has Omni Mount 20 series mounting points and is designed to produce linear, high resolution audio throughout its intended bandwidth.

The Point Concentric 6 houses a single coaxial driver and is suitable for smaller live performances as a stand-alone enclosures, as well as variety of fill applications.

All Point Concentric enclosures are constructed of 12 mm Baltic Birch, rather than moulded plastic or fiberglass, resulting in a lower resonant frequency.
